Geoscience Competencies and Workplace Examples

March 23, 2019

	WORK EXPERIENCE COMPETENCIES		WORKPLACE EXAMPLES
. PROFESSI	ONAL COMPETENCIES		
1.1	Comply with relevant legislation, regulations, and		
	statutory reporting requirements		
		а	Apply for licenses and permits
		b	Undertake stakeholder consultations
		C	Complete and file reports and notifications
1 7	Practice within the bounds of personal expertise and	č	
1.2	limitations		
		2	Undertake celf accordment to identify personal limits
		a	Undertake self-assessment to identify personal limits
		b	Seek advice from professionals with more appropriate expertise
		С	Refer client to other professionals
1.3	Increase relevant knowledge, skills and level of		
	performance over time		
		а	Attend conferences, workshops or courses related to area of
			practice
		b	Undertake focused research or learning to address knowledge
			gaps
		С	Obtain relevant specialty training or certification
1.4	A Maintain constructive working relationships		
	0	а	Undertake and apply diversity training
		b	Provide and accept constructive feedback
		c	Contribute to workplace conflict resolution
1 г	Apply othical principles	Ľ	
1.5	Apply ethical principles		
		a	Communicate consequences of disregarding professional advice
		b	Respond to unethical behaviour of others
		С	Identify and address conflict of interest
1.6	Respond to obligations and responsibilities to the		
	public, to the natural environment, to clients and to		
	employers		
		а	Undertake work activities in a manner that minimizes
			environmental impact
		b	Make decisions consistent with client or employer needs that
		D D	protect the safety, health and welfare of the public
		С	Provide accessible and appropriate information to minimize public
			concerns
1.7	Contribute to health and safety in the workplace		
		а	Proactively address workplace health and safety
		b	Identify unsafe practices or hazardous situations
		с	Contribute to development of site-specific health and safety
			requirements
. COMPETE	NCIES IN SCIENTIFIC METHOD		
	Apply scientific principles		
		а	Use mathematical and statistical principles to analyze data
		a b	Use principles of chemistry and physics to interpret data
			Formulate, test and evaluate hypothesis
			ronnulate, test and evaluate hypothesis
		С	
2.2	2 Effectively utilize scientific literature		
2.2	2 Effectively utilize scientific literature	a	Undertake a literature search
2.2	2 Effectively utilize scientific literature		Undertake a literature search Critically analyze and incorporate published research
2.2	2 Effectively utilize scientific literature	а	Undertake a literature search
	2 Effectively utilize scientific literature 3 Identify uncertainty and ambiguity in data, and limits	a b	Undertake a literature search Critically analyze and incorporate published research
		a b	Undertake a literature search Critically analyze and incorporate published research
	Identify uncertainty and ambiguity in data, and limits	a b c	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources
	Identify uncertainty and ambiguity in data, and limits	a b c a	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection
	Identify uncertainty and ambiguity in data, and limits	a b c a b	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge	a b c a	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge Apply principles of quality assurance and quality	a b c a b	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge	a b c a b c	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results Display uncertainty in analytical results or interpretation
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge Apply principles of quality assurance and quality	a b c a b c a	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results Display uncertainty in analytical results or interpretation Follow established protocols in data collection or analysis
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge Apply principles of quality assurance and quality	a b c a b c	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results Display uncertainty in analytical results or interpretation Follow established protocols in data collection or analysis Review project outcomes relative to quality standards
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge Apply principles of quality assurance and quality	a b c a b c a	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results Display uncertainty in analytical results or interpretation Follow established protocols in data collection or analysis
2.3	Identify uncertainty and ambiguity in data, and limits to knowledge Apply principles of quality assurance and quality	a b c a b c a b	Undertake a literature search Critically analyze and incorporate published research Identify and acknowledge relevant sources Identify bias in data collection Evaluate margin of error on results Display uncertainty in analytical results or interpretation Follow established protocols in data collection or analysis Review project outcomes relative to quality standards

		b	Review similar situations to identify known hazards and risks
		C	Consider potential unanticipated outcomes
	CIES IN AREA OF GEOSCIENCE PRACTICE		
ir	Plan investigations based upon purpose of study, ncorporating existing site-specific information and		
a	ppropriate approaches		Examples of investigations:
		а	geological mapping
		b	geophysical survey
		С	baseline monitoring
		d	geohazard assessment
		е	drilling program
		f	sampling program
		g	environmental site assessment
		h	research project
	Acquire, process and analyze data using appropriate nethodologies		
		а	Use effective devices and instruments to acquire data
		b	Apply locational tools and principles to georeference data
		С	Analyze and process data using 3-D modelling software
3.3 lr	ncorporate relevant data from other sources		
		a	Integrate historical and current data
		b	Include local or regional information
2.4		С	Identify analogs
	nterpret and evaluate data to construct models		
С	consistent with purpose of investigation	-	Dranava and interpret lags, sostions or mans
		a b	Prepare and interpret logs, sections or maps Prepare and interpret spreadsheets, charts or diagrams
		D C	Apply geoscience principles to generate models
350	Critically evaluate models	L	Apply geoscience principles to generate models
5.5 C		а	Address uncertainty and bias
		b	Compare and contrast analogous models
		c	Evaluate validity of model relative to objectives
3.6 F	ormulate conclusions and recommendations	-	
		а	Define drilling targets
		b	Assess site suitability and determine mitigation measures
		С	Assess feasibility based on resource estimation
		d	Provide alternative solutions and make recommendations
3.7 A	Adapt methodologies to address unfamiliar situations		
		а	Modify mapping or sampling methodologies in unfamiliar terrain
			or geological settings
		b	Adapt approach based on stakeholder values
		с	Integrate additional knowledge & skills to address unfamiliar
			situations
		d	Develop new techniques
COMPLEME	NTARY COMPETENCIES - Communication and manage	ement	
	Deliver and comprehend oral communication		
		а	Participate in a consultation or working group
		b	Deliver a geoscience lecture or presentation
		С	Describe a geoscience model to a client, peer or supervisor
4.2 C	Deliver and comprehend written communication		
		а	Prepare and respond to business correspondence
		b	Write a project or funding proposal
4.3 C	Communicate technical information effectively to a	с	Interpret and synthesize written information
v	variety of audiences	а	Create or adapt a presentation for technical and non-technical
		ŭ	audiences
		b	Create or modify written material for technical and non-technical
			audiences
		С	Deliver a geoscience presentation to students
	Manage activities	T	

	а	Plan or coordinate geoscience field work
	b	Plan or coordinate data collection or analysis
	С	Organize a conference, workshop or meeting
4.5 Use time management skills		
	а	Prioritize activities to meet deadlines
	b	Use scheduling tools
	С	Adapt schedule to changing situations
4.6 Provide direction to others		
	а	Provide instructions to students
	b	Advise team members or co-workers
	С	Supervise the work of others
4.7 Contribute to budgetary management		
	а	Evaluate quotes
	b	Estimate costs
	С	Control expenditures
4.8 Apply basic principles of risk management		
	а	Mitigate risk associated with field work
	b	Coordinate activities to manage risk
	С	Communicate business risks associated with geoscience
		interpretations
4.9 Contribute to secure data management		
	а	Use data security software
	b	Protect confidential information or materials
	С	Develop or follow organizational data management protocols
4.10 Maintain comprehensive professional records		
	а	File and archive comprehensive and clear field observations
	b	Label, store and catalogue samples
	с	Prepare and retain business and administrative records
